Product Data for PLC-controlled Machines

1 Contact Information

BBS Automation Hallbergmoos GmbH
Dornierstrasse 14
85399 Hallbergmoos
Germany
info.stuttgart@bbsautomation.com

2 Type, Format and Scope of Generated Product Data

The data includes information such as operating conditions, usage patterns, and potential malfunctions of the product.

Format: scalar values and structures according to the OPC UA standard
Estimated size: depending on concrete machine

3 Continuous and Real-Time Data Generation

The data is generated continuously.

4 Data Storage

The data is either stored persistently or in a circular buffer in PLC memory, machine PC, memory cards at the operator panel, databases at the operator's. BBS Automation is not the data owner.

5 Data Access

a) Users can access the data via the technological interfaces contained in the product.
b) Real-time data can be read via the OPC UA interface, although the technical limitations shall be observed.
